PINWORM PADDLE Patient Instructions

NOTE:

The ideal time for collection is early in the morning before arising and before emptying the bowels.

1. Remove cap in which is inserted a clear polystyrene paddle with one side coated with a non-toxic, mildly adhesive material. This side is marked "sticky side". **Do not touch** this side with the fingers.
2. Separate the buttocks and press the sticky surface against the perianal skin with moderate pressure.
3. Replace the paddle in the tube for transport to the laboratory.
4. Print name, date of birth, and the date and time of collection on the container.
5. Deliver the container to your doctor's office or laboratory as directed.
